

Laser Assisted Dentistry

Training Schedule and Outline

Objective

Customized team training on use of the DEKA C02 Laser and how to incorporate laser dentistry and procedures into the practice. These skills will promote excellence in dentistry and help grow the practice by adding new procedures and reducing referrals.

Morning Session

- **Laser Physics/Implementation:** How the laser works and why it works. Procedures for dentists, biologic rational, non-surgical periodontal therapy for hygienists, scheduling and billing **2 hours**
- **Laser Safety:** Care and maintenance, OSHA compliance, parts and pieces, sterilization, functions and menu **1 hour**
- **Laser Demonstration and Practice:** Practitioners will learn to operate and care for laser. Laser practicum on hotdogs and tomatoes **1 hour**

Afternoon Session

- **Chair Side Mentoring:** Practitioners learn to use laser on their own patients. Each hygienist may treat their own patient or can share a patient. Dentists may also choose to schedule laser patients to benefit from over-the-shoulder mentoring and to learn new procedures or refine their technique **4 hours**
- **Hygiene/Dentist Q&A:** Discuss clinical findings, laser practicum, and treatment planning for success and promotion **30 min.**

Summary

This course is customized to fit each individual office and their needs. The morning session can include the entire office staff to educate them on the benefits of working together to promote a laser practice and teach laser safety for OSHA compliance. CE credits will be issued according to time spent in lecture and with patients.
